2 Work Breakdown Structure

```
                        Stock Management
                             System
```

Feasibility Study	Analysis and Requirement Spec	Design	Implementation	Testing	Installation	Evaluation
Analyse current System	Determine Requirement Spec	Design the SQL Database	Implement the SQL Database	Test the SQL Databases	Purchase the Android device	Meeting with client to compare to requirement spec to the delivered system
Determine costs	Project Planning	Design the GUIs	Implement the GUIs	Test the GUIs	Install the Android device	
Determine Benefits / Rationale		Design the overall application	Implement the complete application	Test the complete application	Train staff	

Quality Assurance	Risk Analysis
